

Creating landscapes
that last a lifetime.

Green Earth Services of Texas

is more than guys with a truck and some equipment. We are landscape design experts who design, install, and service landscapes for the residential and commercial market.

We have a team of talented and professional employees—not subcontractors—who are degreed horticulturists specializing in rich, creative landscape design and landscape architecture services. We can renovate an existing area or start from a blank canvas of dirt. Share with us what you envision and we will help bring it to reality.

At Green Earth Services of Texas, we know that investing in professional landscape design adds value and curb appeal to your property. We work with our clients to ensure the true potential of each property is captured in our designs.

Let Green Earth Services of Texas design and install your residential or commercial outdoor solution. You will enjoy it for years to come.

Gerick Schraub, Owner

SERVICES

- Landscape Design
- Landscape Renovation
- Landscape Installation
- Landscape Irrigation
- Drainage Systems
- Outdoor Lighting
- Landscape Maintenance

Our Process

Your yard is an extension of your home or business. Because Green Earth Services of Texas understands that, we collaborate with you, walk your property, and get a feel for the site and the scope of your project. Most important, we listen and ask questions so we can envision your goals and style. The possibilities for your landscape design are endless, so we consult with you to help turn your thoughts into reality.

Next, Green Earth Services of Texas will study your site's conditions and determine the assets, needs, and limitations of your property. From there we prepare landscape drawings to reflect your landscape renovation or new plan from scratch. We present our landscape design and plan—professionally rendered to scale. Gerick Schraub, owner of Green Earth Services of Texas, goes over the plan in detail to help you understand the future growth, maintenance, and value of the presented solution.

Upon your approval of the preliminary design and budget, Green Earth Services of Texas will schedule your project without demanding any money down and will take some “before” photos. During the installation phase, only top-quality plants and materials are handpicked by the owner.

After the installation is completed, Green Earth Services of Texas provides a walk-through to educate you on the best maintenance options, instruction on watering or future care.

I have been so pleased with the quality and commitment that Green Earth Services of Texas has provided. They were professional, courteous, and worked with me to develop and install a home landscape to meet my needs. They also followed up with me regularly to ensure I was satisfied with the work they performed, and that lets me know that they care about me as a customer. I highly recommend Green Earth Services of Texas to anyone who is looking for great service and beautiful results, and I will continue to call them for all of my future landscaping needs.

— S. Lancart, Southlake

When we decided to renovate our backyard and build an outdoor escape consisting of soft- and hardscape, we needed someone who could assist with both the design and construction of the project. Green Earth Services of Texas provided detailed drawings and turned them into a very creative solution on time and on budget. From the first day to the last, Gerick and his staff were always available to answer questions and provide consultation to us until our outdoor kitchen and backyard landscaping was finished. Thank you Green Earth Services of Texas for making our dreams come true.

— R. Helgason, Colleyville

Gerick and Tim are so creative. Their talent, work ethic, and good business sense make an unbeatable team. I turned my yard completely over to Green Earth Services of Texas, and I have been extremely happy and pleased with the result. Besides the artistry of their landscape designs, they are dependable and honest—they get the job done! I would recommend Green Earth Services of Texas, without reservation, to anyone in need of residential landscape design and install help.

— R. Hurn, Flower Mound

From beginning to end, we invite you to brainstorm with us to create your design, or you can simply let us craft a plan for you.

Using today's advanced design software, Green Earth Services of Texas will design a landscape plan to scale so you can easily see the end solution and where the hardscapes and softscapes are—plants, flowers, colors, everything. Landscape drawings and budgets are presented and explained for approval.

The company owner discusses all details including future maintenance prior to any final agreement and before payment is requested and installation begins.

Landscape installation can be quite an undertaking. An error in installation can ruin your plan—which may include expensive trees, shrubs, flowers, and grasses—usually with no second chances. Green Earth Services of Texas ensures that our designs are installed with the highest level of workmanship so your end landscape solution will continue to grow and thrive.

By taking the time to have Green Earth Services of Texas design a landscape plan, discuss the details, and have a professional team provide the installation services, you will experience the rewards for a lifetime!
